PBL-3 Weekly Progress Report – Groupwise

Students Name (Groupwise)	Mihir Sanghvi Krishna Agarwal Mahika Tuteja	**Programme:**	**B. Tech AIML (CSE)**
Semester/ Section	**V**	**Reg Numbers: (Groupwise)**	2427010544 2427010030 2427010439
Student Mobile Number		**Course Code:**	**AIM3170**
Student Email –IDs:	mihir.2427010544@muj.manipal.edu krishna.2427010030@muj.manipal.edu mahika.2427010439@muj.manipal.edu	**Date and Week: (e.g. : I, II, III, etc)**	Week V 15-10-2026

MANIPAL UNIVERSITY
JAIPUR

Name of Faculty Supervisor	Dr. Preeti Narooka
PBL-3 Project Title:	PACE: Project Allocation, Coordination and Evaluation Portal
Programming Language (Front End, Back End, etc)	**Front end:** TypeScript, React 19, Next.js 16 (App Router), Tailwind CSS v4, PDF.js **Back end:** Supabase (PostgreSQL with Row Level Security, SQL / PL/pgSQL functions, Auth, Storage), Next.js route handlers on Vercel for LinkedIn **Tools:** Git and GitHub, Vercel, Python (faculty directory scraper)
Project Status **(% of work Completed)**	70%
Weekly Project Progress-Summary	Mentor registration with the signed PBL form: the team lead uploads the form, the supervisor approves, asks for changes or rejects, and the lead can resubmit a corrected form. Database rules: at most three open requests per group, one supervisor per group, a supervisor can take at most seven groups, and two supervisors cannot approve the same group at the same moment. Change of supervisor: a query approved by the current supervisor and then the administrator; the administrator can also move a group with a reason, or allot supervisors at random to groups without one. Notifications are now created by the database itself for every request, decision, report and grade.
Individual Contribution of Student (Must fill- for every individual in the group by Supervisor).	Mihir Sanghvi: wrote the mentor request and supervisor change database functions with row locks, the notification triggers and the random allotment. Krishna Agarwal: built the request review screens and tested the full request cycle (approve, ask for changes, resubmit, reject) with separate test accounts. Mahika Tuteja: drafted the achievement categories and question templates from MUJ's student achievement posts, and prepared the content for announcements.
